

Structure Of Products

Honeycomb paper

Polyurethane

Fireproof door material

New-style reinforced thickened and widened side lock

"Quickly in locking, emergently in unlocking", it has dual-locking bullet structure with the latest ultrastrong design and the functions of guarding against drilling, prizing, sawing and technical unlocking.

Ulthrick door leaf, dual-burglarproof buckle edge, thickened inner-folding doorframe

The door leaf has ultrathick dual-burglarproof buckle edge structure, the thickness of door leaf reaches 90mm, has ultrastrong impact resistance and good effect of sound isolation, after tightening of 4 paths, the tightness becomes better,(dual burglarproof buckle edge door leaf+thickened inner-folding doorframe+dual-path grooved burglarproof buckle edge), it has ultrastrong burglarproof performance for the door leaf and the doorframe meshed.

Hidden alarm multi-purpose doorbell

The doorbell hidden in the door, the door face look more attractive; the button of doorbell can be identified even at night. It can easily transmit outside messages, has practicability and attraction.

New-style reinforced hinge

It adopts thickened, widened and reinforced adjustable hinge, steadily in rotating the bearing, it can completely resolve the difficult problems that door leaf may cause falling position and moving position when using for a long time, it has unique design and excellent performance.

Surface treatment

The surface through phosphatization heat treatment has the ultrastrong effects of acid resistance and alkali resistance, the door face looks bright and lustrous for adopting powder lacquer of environmental protection with ultraviolet resistance.
