# Say hello to a new age in door security. Say hello to Yale Keyfree.

We are all used to unlocking our cars with a remote control, but wouldn't it be great if you could do the same thing with your front door?

Well now, thanks to Yale you can – with this brand new product only available on new composite doors from selected dealers.

Keyfree is the very latest in door security from Yale, and combines peace of mind with convenience by allowing you to access and protect your property without a key.

Whether you use the remote control like your car, or enter your own 4-12 digit code into the built-in keypad, Yale Keyfree couldn't be easier to use – and because it's brought to you by Yale, you know it's technology you can trust.

With Yale Keyfree everything's covered. The unit is powered by its own batteries - so even if the power fails it still works, it's backed up by an override key for emergencies and unless you ask it not to, it will even talk to you as you use it!

No more lost keys, no more rummaging in your bag and no more cutting keys for visitors – Yale Keyfree is the perfect way to make your new door complete.

**Make sure your new door is fitted with Keyfree – and unlock the next generation in home security from Yale.**

## Multiple Keyfree options

A small, remote control keyfob with a 10-metre range can be used to unlock your home – or enter your own 4-12 digit code into the built-in keypad.

## Robust and reliable

Keyfree requires no hard wiring, and has been rigorously tested under extreme weather conditions.

## Security matters

Feeling safe at all times is a must for any homeowner. Keyfree has been designed and tested to meet Secured by Design – the UK police initiative for safer homes and also features a built-in 80-decibel alarm to scare off anyone who tries to attack the lock!

Peace of mind from a trusted brand.

Illuminated keypad helps with operation in the dark.

Sliding compartment reveals the mechanical over-ride and battery backup.
